PROJECTS

Project Title: **Restaurant Billing**

This C++ project is about billing the customers of any particular restaurant, according to their dishes/cuisines they order.

The customer has to select an item from the given menu and their quantity, as an output the system displays total bill.

Project Title: **Point Of Sale**

This Java project using MySQL is all about buying and selling of goods, it consists of all the requirements which are needed for the market system.

The system gives you agility to check on your products and modify them, it does perform all the functions like add, delete, and much more. You can look after your products and their details at any time, after scanning barcode as a result the bill is generated.

Project Title: **Home Automation**

This hardware based project using Arduino, Bluetooth, Battery and Relay to android device is a combination of hardware and software technologies which enable control and management over appliances within home.

EXTRA-CURRICULAR ACTIVITIES

1. Participated in the hardware based event named 'I am Engineer' held by ESF at GNDU and won third prize.
2. Participated in 18th SOF National Science Olympiad.
3. Completed Knockdown the Lockdown course offered by TCSion.
